

Drugs and Alcohol Policy

Policy type:	Local
Approved by:	AQC (Matt Smith, Assistant Principal – Pastoral)
Effective from:	November 2022
Revision date:	November 2023

Document History

Changes to grammar, punctuation, spelling and sentence structure have been made throughout the document. In addition to these minor changes the following have been made.

Version	Date	Author	Changes
V1	January 2023	Matt Smith	

A drug is any substance, taken into the body, which alters the way in which the mind or body functions.

This policy refers to the use of drugs, alcohol, tobacco and other substances, both legal and illegal, when used for the purpose of intoxication, recreation or general misuse. ‘Illegal drugs’ refers to any substance included under the provision of the current Misuse of Drugs Act. Where the document refers to drugs, this includes alcohol, tobacco, illegal drugs, medicines, novel psychoactive substances and volatile substances, unless otherwise specified.

This policy covers all learners and any incidents or evidence relating to a drugs issue will be assessed by a member of the safeguarding team to determine the right course of action. This means that a learner who is over 18 should be responded to and referred to in the same way as a learner who is under 18 by members of staff.

This policy relates to all College premises and settings, such as work placements and other College-related activities, such as trips and visits.

Policy Aims and Objectives

In keeping with the approach to drugs awareness and education in the broader community, at national and local levels, the College is committed to ensuring that drug issues are addressed through the tutorial programme, the promotion of local drugs and alcohol support services, and the prevention and efficient management of misuse.

The College believes that the misuse of drugs is detrimental to the health and well-being of an individual and will impact on their ability to be a successful student.

The College is committed to:

- educating the students about the impact on them and those around them of substance misuse;
- helping students to make informed decisions in their own lives;
- offering support and advice to those who seek it;
- dealing with criminal activity appropriately and responding to activity that is in breach of the College's Code of Conduct.

To fulfil these aims the College will develop and implement procedures to:

- promote awareness, via the Tutorial Programme and Student Services, of the effects of substance misuse and the longer term harm caused by alcohol and tobacco use;
- identify instances or individuals where there are grounds for concern relating to substance misuse and initiate actions to keep them safe or impose disciplinary measures;
- work closely with the local police services;
- facilitate effective partnership working with local and national health organisations.

Responding to Drug-Related Incidents

Drugs, drugs paraphernalia and alcohol must not be brought into college. Students must not come onto the college site under the influence of these substances. This is made clear in the student Code of Conduct. A student whose behaviour is impaired by drugs or alcohol or is in possession of drugs or drugs paraphernalia or alcohol will be immediately referred to the Assistant Principal Pastoral who will take appropriate action.

The only exception to this rule concerns smoking, on which we have a separate policy and a dedicated smoking area. For more information see the no-smoking policy on the website.

In practice the misuse of drugs, drugs paraphernalia and alcohol will be dealt with by the Assistant Principal Pastoral under the College Code of Conduct. Where any member of staff has reason to believe that a student may have committed a criminal offence in which the College has an interest, the College reserves the right to refer the matter to the police. If the College has a reasonable belief that a student is in possession of drugs, the police will be informed. We do not have to inform parents or guardians, although we would usually do so. Any searching or confiscation of substances, whether they are known to be or suspected to

be illegal, should only be carried out by a senior member of staff. All incidents will be centrally recorded by the Designated Safeguarding Lead.

There may be occasions when the student's alcohol or substance misuse, or the alcohol or substance misuse of parents and care givers, raises safeguarding concerns. In these cases the College's Safeguarding Policy and Child Protection Policy and Procedures will need to be followed.

Education, Support and Advice

Drugs Education via the tutorial programme will reinforce the educational emphasis on knowledge, awareness and skill development. It will challenge prevalent social norms relating to drugs, alcohol or tobacco and their use. It will provide information about the dangers of drug and alcohol misuse and it will inform students about the current law around illegal substances.

The College is committed to giving support and advice on ANY drug or alcohol related issue and students are actively encouraged to approach their tutor or the Health and Wellbeing Coordinator for advice and guidance.

A range of support services exist both within College and in the wider community. The College will make details of these services readily available to all students and staff.

These include:

In College

The Health and Wellbeing Coordinator – Kirsten Halvorsen

The College Counselling Service - confidential support from trained counsellors. Available every day.
